The IAF is the world association of Conformity Assessment Accreditation Bodies and other bodies interested in conformity assessment in the fields of management systems, products, services, personnel and other similar programmes of conformity assessment. Its primary function is to develop a single worldwide program of conformity assessment which reduces risk for business and its customers by assuring them that accredited certificates may be relied upon. Accreditation assures users of the competence and impartiality of the body accredited.

Through this international recognition the certificates issued by SADCAS accredited certification bodies are recognized in 68 economies worldwide thus removing the need for repetitive certifications. Effectively this means that through internationally recognized accreditation SADC Member States serviced by SADCAS and whose certification bodies are accredited by SADCAS have better access to foreign markets – A truly global reach.
